☎ (+91)-7767844499 | ✉ jichkar.akhilesh@gmail.com | 💻 akhilesh-jichkar | 📱 AkhiJix | 🏠 Bengaluru, India

Skills

- **LANGUAGES:** Java, Kotlin, Python, JavaScript, Dart, SQL
- **BACKEND:** Microservices, Docker, GraphQL, Elasticsearch
- **TOOLS:** Flutter, ReactNative, Tensorflow, Firebase, Github
- **ANDROID:** Compose, Coroutines, Flow, Dagger, Room DB, Maps
- **WEB:** React, Node, RestAPI, SpringBoot, PostgreSQL, MongoDB
- **SOFT SKILLS:** Team Leader, Communicator, Prolific, Disciplined

Work Experience

PasarPolis | BENGALURU, INDIA

Feb 2023 - Jan 2024

SENIOR MOBILE DEVELOPER

(L/O : Funding Challenges)

- Led the Mobile App Team which overlooked the development of 4 Android and 4 iOS apps, for 5000+ users at an Indonesian startup.
- Transitioned existing code to implement BLoC architecture, while achieving 70% code coverage, & reducing memory leaks by 50%.
- Collaborated with PMs of 5 verticals to develop automated CI/CD pipelines in fastlane and expedited build/release process by 90%.
- Wrote custom scripts in JavaScript and React to work with Flutter web libraries and facilitate payment portal integration with GoPay.

Bridgetree | BENGALURU, INDIA

May 2022 - Oct 2022

ANDROID DEVELOPER

(L/O : Budget restructuring)

- Restructured the existing application to increase network efficiency for a voter survey app by 32% for the Republican Party of USA.
- Implemented Clean MVVM to show voting patterns in Maps and developed caching mechanisms to reduce network calls overhead.
- Wrote unit test cases for new modules in JUnit, conducted integration tests using Mockito and performed UI testing with Espresso.

Brigoshia Technologies | BENGALURU, INDIA

Feb. 2021 - Mar. 2022

JUNIOR SOFTWARE DEVELOPER

- Launched Aulas classroom to 1000+ users by using Kotlin, Room, Coroutines, Flow, Dagger, with Express.js and MongoDB backend.
- Contributed to video calling libraries using RTC, and wrote backend microservices in Spring Boot with RabbitMQ to deploy on AWS.
- Utilized WorkManager, synchronization, and error handling to reduce BLE device disconnection issues for Exide Batteries by 60%.

Wonksknow Technologies | BENGALURU, INDIA

Feb. 2020 - Jan. 2021

ANDROID DEVELOPER | FLUTTER DEVELOPER

- Onboarded 500+ students by developing a real-time chat feature from scratch in two Android apps using Firebase API and Firestore.
- Developed an employee attendance app in Flutter to track 50+ employees, using AWS, Node.js, Python, and Flask for the backend.
- Led 20+ training sessions on Android, Java, and Python, while contributing to the development of an advanced Flutter curriculum.

Personal Projects

Freelance Projects

Jan 2024 - Present

TOOLS: FLUTTER, POSTGRES SQL, AWS, PYTHON, ML, GRAPHQL

- Sold an Inventory Management system using PostgreSQL as the backend & used Flutter to deploy Android, iOS, and Web endpoints.
- Assisted IIT KGP PhD candidates with an app which uses ML scripts in Python to detect Lead and Nitrate levels via image samples.
- Developing a hyperlocal application using React Native & GraphQL to fulfill community specific needs while helping users socialize.

Joggernaut Android App

Feb 2024

TOOLS: ANDROID, KOTLIN, ROOM, SERVICES, FLOW, SENSORS, HILT, MAPS

- Developed an Android app that utilizes Android's Step Counter, Remote Service and Content Provider to monitor user workout.
- Integrated a map view which uses GPS to access user location and draws the path taken by the user during the current workout.
- Calculated calories and distance, plotted these values in real time, while also giving a daily, weekly and all-time summary.

iNavi - Intelligent Navigation Aid for the Visually Impaired

Nov 2023

TOOLS: TENSORFLOW, ANDROID, PYTHON, DOCKER

- Developed an Android application to help visually impaired users navigate the streets independently without external guidance.
- Generated training data, performed data pre-processing, and used TensorFlow's MobileNet architecture to create a trained model.
- Designed a CNN using Python and Docker, and deployed the trained model on Android, identifying obstacles with 89.15% accuracy.

Github Android Projects

Apr 2022

TOOLS: ANDROID, KOTLIN, COROUTINES, ROOM, FLOW, FRAGMENTS, MVVM, PICASSO

- Created a News Application with an Offline Caching and Paging functionality using Network Bound Resource and Remote Mediator.
- Developed a robust Tasks Application using Room, Flow, Navigation, Hilt, Fragments & NavArgs utilizing a Clean MVVM architecture.
- Created a Weather Application using Jetpack Compose, which uses OpenWeather API to show current and future weather forecasts.

Education

San Jose State University | CALIFORNIA, USA

2017 - 2019

MASTER OF SCIENCE IN COMPUTER SCIENCE

Ramdeobaba College of Engineering and Management | NAGPUR, INDIA

2013 - 2017

BACHELOR OF ENGINEERING IN COMPUTER SCIENCE AND ENGINEERING

Honors and Awards

- **BEST INTERVIEWEE**, InfoCepts Internship Program 2016
- **BRANCH COORDINATOR**, Student Mentor Forum
- **TEACHING ASSISTANT**, San Jose State University
- **TECHNICAL COORDINATOR**, Polaris RCOEM 2016
- **BEST SECTION / CLASS REPRESENTATIVE**, RCOEM
- **RESEARCH PAPER ACKNOWLEDGEMENT**, IIT KGP
